SALVAGE-MASTER WET VACUUM

The Salvage-Master P/N 970200, has incorporated a ground fault circuit interrupter (GFI) P/N 970085, since 1985. However, SURVIVAIR occasionally receives Salvage-Master Wet Vacuums which have been manufactured prior to GFI installation or the GFI does not function, has been disabled, or it has been removed by the end user.

Effective immediately, SURVIVAIR will repair Salvage-Master Wet Vacuums only if:

1. The Salvage-Master has a properly operating GFI.
2. The owner authorizes installation or repair of a GFI.

For those owners who do not wish repair, SURVIVAIR will send out the attached letter. Please conform to this policy when repairing any Salvage-Master Wet Vacuums.

Questions regarding this bulletin may be directed to SURVIVAIR Technical Services.
