The first and only cost-effective anchorage solution to protect workers engaged in leading edge deck construction.

**Miller® DuraFlex® Python® Harnesses**

The Python Harness is the next generation of the patented DuraFlex harness series. The shoulder straps are constructed of soft, cushioned tubular webbing; the lower torso straps of specially-formulated DuraFlex stretchable webbing; and the leg straps of lightweight, non-stretch webbing. In this combination, the Python Harness not only increases overall comfort, but holds its shape for ease of donning.

* Also features built-in loops, removable tool belt, and 6 inch back pad.

**Miller® Specialty DuraFlex® Harness**

Miller’s patented DuraFlex full-body harness stretches with every movement. Our exclusive specially-formulated elastomer webbing allows greater freedom of movement, and offers improved comfort and overall safety. It’s been proven in the field — when workers wear DuraFlex Harnesses properly, they are more comfortable, safer and more productive.

**MILLER CONSTRUCTION HARNESS E650-77**

Features include:
- permanently attached back pad with positioning side D-rings
- belt loops to accommodate the removable 6140N body belt

**Miller® MightyLite Self-Retracting Lifeline Series**

Miller MightyLite Self-Retracting Lifelines are the perfect fall protection solution for any application. Select from a complete series of varying length lifelines in galvanized wire rope, stainless steel wire rope or polyester webbing (20- and 50-foot units only).

* Does not apply to Canada due to CSA Z259.2-98 requirements.

**Miller® MiniLite™ Fall Limiter**

The MiniLite Fall Limiter is a self-retracting lanyard with a quick-activating braking system that limits free falls to inches. It offers up to 11 feet of working capacity and its compact design fits in the palm of your hand.

**MILLER MINILITE FL11-3**

Features include a steel twist-lock carabiner and stainless steel swivel shackle.

The Miller Edge Fall Protection System is a portable engineered anchorage solution designed to protect decking crews from fall hazards. The Miller Edge reduces the need for a safety monitor or a temporary cable lifeline system on leading edge deck construction.

**the miller edge provides...**

- **Mobile overhead anchor point:** Increases worker safety by providing 100% tie-off capability in leading edge applications
- **Cost-effective alternative to a safety monitoring system that provides no added value**
- **Reduces swing fall hazards present with fixed cable lifeline systems**

**Freestanding anchor point design:**
- **Saves valuable man-hours since the unit is ready-to-use when placed in position. No wasted time installing temporary cable systems that could also create tripping hazards.**

**Solid Althane™ wheel casters:**
- **Greater mobility and easy maneuverability of the unit to follow leading edge**
- **Unaffected by surface obstacles such as nails, nuts and bolts, etc.**

**Two integral eye bolt attachment points accommodate self-retracting lifelines:**
- **Provides fall protection for up to two workers simultaneously**

**Three-component design:**
- **Easy assembly/disassembly for transport and storage**
- **Predetermined integral lifting points:** Allows for quick, easy crane cable attachment for lifting on/off deck

**Heavy-duty steel construction with protective enamel paint:**
- **Endures rugged handling and extreme weather conditions for long-life performance**

**Easy access handles on front and rear:**
- **Provides easy maneuverability when moving unit toward the leading edge**

**Redundant braking system:**
- **Prevents unit from moving unintentionally**

---

**Applications:**
- Concrete deck construction
- Bridge decks
- Window washing
- Vault entry
- Rescue situations
