HONEYWELL RIG DOG™ GLOVES
Enhanced hand impact protection and comfort featuring CoreNest™ Technology.
Hand injuries are a major problem in heavy-duty industrial environments

1.1 MILLION workplace hand injuries.¹
70% of injured workers were not wearing gloves.²
43% of all recordable incidents on drilling rigs.³

¹ Bureau of Labor Statistics
² ISHN (2015) “70% of workers who injure their hands aren’t wearing gloves”
³ EHS Today (2016) “Hand and Finger Injury Risks in the Oil and Gas Industry”

Why workers complain about their gloves

1. Insufficient protection
2. Poor grip
3. Poor comfort and dexterity
4. Oil permeation
5. Not durable

Recordable industrial injuries

60% Other Body Injuries
40% Hand Injuries

That’s why we revolutionized hand protection: Rig Dog™

We drew from our years of experience in industrial workplaces to innovate Honeywell Rig Dog™ gloves. No matter whether you work in oil and gas, mining, construction or another high-risk job, Rig Dog™ has a patented design that provides the comfortable, heavy-duty protection and dexterity your team needs to work confidently and effectively.
Rig Dog™ Key Features and Benefits

1. Elevated fingertip protection
2. Ergonomic design for high dexterity
3. CoreNest™ Technology: composite materials (sandwich structure fabric) inserted into the TPR (Thermoplastic Rubber) for enhanced impact resistant property on knuckle
4. High visibility green TPR fingers provides an “OK” hand-signal in noisy applications
5. High visibility red palm provides a “STOP” hand-signal in noisy applications
6. Available with easy-to-grab wrist tab or slip on and off cuff
7. Reinforced thumb-crotch protection
8. Flex-grooves to provide increased dexterity
9. TPR coverage on back of hand provides good impact resistance
10. Least stitching among competitors to decrease oil permeation
11. Multilayer fabrics to provide cut and abrasion resistance and enhanced grip
12. Moisture absorption and quick dry inner layer
13. Ventilated cuff for cooling comfort

Industries
- Oil & Gas
- Construction
- Railways
- Mining
- Heavy-duty Industry

Applications
- Rigging
- Drilling
- Material handling
- Ship building
The Layers of Protection and Comfort

Rig Dog™ gloves have layers specially designed for comfort. The layer of knitted fabric with foam inside serves as the substrate of TPR on the back of the glove to provide comfort. The inner layer offers moisture absorption and a quick dry function to quickly absorb sweat and keep hands dry. Using innovative foam-knitted fabric and real-world feedback, Rig Dog™ gloves are designed with an emphasis on the wearer’s comfort, even during long, demanding shifts. Because they can’t keep workers protected, if workers don’t want to keep them on.

Featuring Honeywell CoreNest™ Technology for Impact Protection

Honeywell’s patented Honeycomb structured thermoplastic rubber (TPR) offers you enhanced impact protection and energy absorption on the back of the hand without compromising dexterity and comfort.

CoreNest™ Impact-Resistant Material
(Honeywell Patented Technology)

3-layer Multi-functional fabric:

- Oil grip
- A6 Level Cut-Resistant Fabric
- Moisture Management
- Foam-Knitted Comfortable Fabric
- Optimized Impact-Resistant Rubber
Proven Reliable

The standardization of performance tests has made it easier for safety managers to compare the effectiveness of different safety gear, because these tests are performed impartially by a third party.

Thanks to patented CoreNest™ technology, Rig Dog™ not only complies with EN 388 mechanical and impact standards (P), it also performs 17% better on impact tests than standard glove materials. Rig Dog gloves were developed to achieve the highest level of impact protection (level 3), according to ANSI/ISEA 138, which will be published in the U.S. in 2019.

That’s not all. Their A6/F level cut resistance, level 5 moisture management and no oil permeation on the palm also were better than the other gloves tested.

Rig Dog™ Xtreme

- Provides enhanced impact protection and comfort with enhanced grip for handling oily surfaces.
- Available with hook-and-loop closure or slip-on cuff.
- Winner of the 2018 Good Design Award and is recognized in the GOOD DESIGN BEST 100 category.
Rig Dog™ Cold Protect

- Provides improved impact protection and comfort with enhanced grip for handling oily surfaces with EN 511 winter lining for cold environments down to -20°F.
- Available with hook-and-loop closure or slip-on cuff.

Rig Dog™ Waterproof

- Provides the protection of Xtreme and adds a water-resistant barrier that offers protection and comfort in wet applications.
**Rig Dog™ Mud Grip**

- Provides the protection of Xtreme but has an additional PU tread palm that squeegees thick oily mud from surfaces to grip surfaces more securely.
