Earplug Fitting Instructions

Keys to Successful Hearing Protection with Earplugs

Wear
Read and follow all earplug fitting instructions.

Selection
Avert overprotection in minimal noise environments — in selecting the best earplug for your situation, consider noise levels and your need to communicate with co-workers or hear warning signals on the job.

Maintenance
Inspect earplugs prior to wear for dirt, damage or hardness — discard immediately if compromised.

Hygiene
For proper hygiene, discard Single-Use earplugs after use.

Storage
With proper maintenance, Multiple-Use earplugs can last for 2-4 weeks; clean with mild soap/water and store in a case when not in use.

Clean & replace
Clean and replace pods on Banded earplugs regularly.

Get the most out of your earplugs

Acoustical Check
In a noisy environment with earplugs inserted, cup your hands over your ears and release. Earplugs should block enough noise so that covering your ears with your hands should not result in a significant noise difference.

Proper Fit
If either or both earplugs do not seem to be fitted properly, remove the earplug and re-insert.

Removal
Gently twist earplug while slowly pulling in an outward motion for removal.
