Product Numbers	Details
 MAX-1S	<b>MAX Small - Uncorded</b> NRR 30 Canada Class A(L)
 MAX-30S	<b>MAX Small - Corded</b> NRR 30 Canada Class A(L)

**Overview**

**Key Features**

As the saying goes, "One size earplug does not fit all size ears."

And sometimes even the tightest rolled-down foam earplug won't fit comfortably in the smallest of ear canals. Fitting ear canals of all shapes and sizes doesn't have to be difficult. That's why we created MAX Small, delivering the same comfort as our flagship MAX single-use earplug, in a 20% smaller size.

Features:

- Smaller version of flagship Howard Leight MAX earplug 20% smaller, ideal for smaller ear canals
- Bell shape delivers maximum in-ear comfort
- Contoured design easier to insert, resists tendency to back-out of ear canal
- Polyurethane foam enhances comfort, especially for long-term wear
- Smooth, soil-resistant closed cell-foam skin prevents dirt build-up
- NRR 30

**Recommended Industries/Use**

- Agriculture
- Chemical
- Construction
- Food Services
- Forestry
- Government
- Law Enforcement
- Manufacturing
- Medical
- Military
- Mining
- Municipal Services
- Oil and Gas
- Pharmaceutical
- Transportation
- Utilities
- Welding
- Nuclear

**Hazards**

- Noise

**Regulations**

- 

## Specifications

### Color

- Dreamsicle Orange

### Shape

- Bell

### Material

- Polyurethane Foam

### Packaging Options

- Polybag

### Cord Options

- Uncorded, Corded

### NRR

- 30

### Canada Class

- A(L)

## Training & Proper Use

1. With clean hands, roll the entire earplug into narrowest possible crease-free cylinder.
2. Reach over your head with a free hand, pull your ear up and back, and insert the earplug well inside your ear canal.
3. Hold for 30 – 40 seconds, until the earplug fully expands in your ear canal. If properly fitted, the end of the earplugs should not be visible to someone looking at you from the front.
4. Proper Fit – If either or both earplugs do not seem to be fitted properly, remove the earplug and reinsert.
5. Removal – Gently twist earplug while slowly pulling in an outward motion for removal.
6. Acoustical Check – In a noisy environment, with earplugs inserted, cup your hands over your ears and release. Earplugs should block enough noise so that covering your ears with your hands should not result in a significant noise difference.

## Additional Information

### CARE + MAINTENANCE

- INSPECT – Inspect prior to fitting, examine your earplugs for dirt, damage or extreme hardness—discard immediately if compromised.
- DISCARD – For proper hygiene, discard Single-Use earplugs after use.
- HYGIENE – To maintain hygiene standards, Single-Use earplugs should be discarded at the end of every shift.
